getbusi
Smart filtering for the new web

liveAir

Fast, powerful and flexible filtering. Anywhere, anytime.

Getbusi LiveAir

A simple, elegant and affordable hosted solution

Implementing full-featured web filtering is now even easier and more affordable with Getbusi's hosted solution, Getbusi LiveAir. Simply pay for the service as you need it, and let Getbusi take care of the rest.

Total control inside and outside the network

Mobile devices such as laptops bring freedom and flexibility to school and work environments, but retaining control when they leave the network can be difficult. Getbusi LiveAir delivers seamless filtering and reporting, wherever they go.

The best, smartest technology available

One of the world's leading filtering engines. Anonymous proxy blocking. Mobile device protection. Protocol filtering. Malware protection. Getbusi LiveAir brings you uncompromised performance in today's complex and changing web environment.

Simplicity, functionality and innovation

Getbusi LiveAir maintains Getbusi's signature user and admin simplicity—all complexity is hidden behind a clean, intuitive web-based interface.

Key features of LiveAir

✓ Intelligent web filtering

✓ Real-time categorisation

✓ Real-time reporting

✓ Policy-based controls

✓ Anonymous proxy blocking

✓ Protection outside the network

✓ Malware protection

✓ Protocol filtering

✓ LDAP support & seamless authentication

"Getbusi allows us to enforce an internet usage policy, monitor productivity and maximise our network resources."

- Nathan Barry, Systems Admin, Halley & Mellowes

Getbusi LiveAir Feature Highlights

Granular policy-based controls

Instantly apply policies to match the unique culture of your organisation

- ✓ Support organisational structure and user groups
- ✓ Quickly and easily implement time-based policies

Anonymous proxy blocking

Block access to anonymisers used to bypass filters

- ✓ Real-time categorisation ensures fast identification
- ✓ A dynamically-updated database of over 1 billion URLs ensures comprehensive, ongoing protection

Protection outside the network

Getbusi Air delivers seamless filtering and reporting, wherever mobile devices go

- ✓ Enjoy the freedom and power of mobile without compromising protection

Protocol filtering - IM, P2P, file type blocking

Decide the balance that's right at your organisation

- ✓ Protect productivity, bandwidth and your network
- ✓ Maintain compliance and duty of care

Intelligent browser-based interface

Quickly and easily administer Getbusi via a clean, intuitive interface.

- ✓ Access securely using any web browser

Real-time reporting

Maintain transparency, measurability and compliance with granular, real-time reporting

- ✓ Generate customised, actionable analytics
- ✓ Reports emailed to you when you need them
- ✓ Use as much or as little detail as you need
- ✓ See exactly how your network's used, in real-time
- ✓ Review attempted policy breeches
- ✓ Explore information, with powerful graphing, drill-down and export functionality

Malware protection

Filter sites containing network threats such as spyware, adware, phishing and malicious applications.

- ✓ Real-time categorisation discovers new threats before most security applications know they exist
- ✓ Database of malicious URLs is continually updated via qualified 3rd party feeds
- ✓ Preserve IT continuity while reducing overhead

Things to make life easier

Getbusi is designed to make performance web filtering and reporting as simple for you as possible.

- ✓ Simple administration from anywhere, by any of your users with administrator capabilities
- ✓ Fast, straightforward integration
- ✓ LDAP Active directory support
- ✓ Seamless authentication support
